General Principles (1st base pinned)

This version of the 60', 4-Umpire System is based on the following philosophies:

- 1. Front load umpires ahead of the runners/plays whenever possible utilizing rotations.
- 2. Assign responsibilities and rotations to cover the plays with the highest probabilities in order of priority.
- 3. When assigned multiple base coverage, the umpire must let the ball take them to the play. The umpire must remember not to overcompensate their position should they be required to make a call on a subsequent play at another assigned base.
- 4. Prioritize freedom of movement for fielders and runners so that umpires do not hinder any play as a result of their positioning or rotations. When assigned single base coverage, this may require the umpire(s) at 1B/3B to move into foul territory to observe playing action and adjust their position should a "Play" (ball and runner coming together) develop.
- 5. Umpire communication is imperative to insure proper coverage and rotations. Communication shall occur early and continuously throughout the development of the play. Communication may be audible and/or visual.

Fundamentals

- 1. When a play is Routine, each umpire is responsible for all calls at their assigned base.
- 2. On any "Routine Ball" to the outfield, (base hit or fly ball) U2 will immediately move inside to the working area between the mound and 2B.
- 3. Three positions in the course of each play: Starting, Reacting, Adjusted
 - a. Starting: Umpire's position prior to the pitch.
 - b. *Reacting:* Umpire's initial movement based on reading the ball, reading your partners, and the need to adjust positioning.
 - c. *Adjusted:* Umpire's follow-on movement, after the reacting position is achieved, that is required to attain the best position for a call
- 4. U2's area of responsibility extends from Left and Right fielder if they are going in, back, or toward Center Field. U1/U3 will cover Left / Right fielder respectively if moving toward the foul line.
- 5. On "Trouble Balls" one umpire reads the situation and goes out for the best angle/distance to make the decision on the batted ball.
- 6. If two umpires initially take a Trouble Ball, the crew will defer to U2; the other umpire will recover and rotate.
- 7. When one umpire commits to cover a Trouble Ball, the three remaining umpires adjust to provide the best *Reacting Position* (normal rotated position based on runners/ball location) and *Adjusted Position* (based on developing action) to cover the play.
